CAREER OBJECTIVES

As a final-year IT student with strong skills in front-end development and Python, I am passionate about building innovative and user-focused solutions. I thrive in fast-paced environments and constantly seek opportunities to learn and grow. My attention to detail and problem-solving mindset drive me to deliver high-quality results. I aim to contribute meaningfully to dynamic tech teams and evolve as a versatile developer.

EDUCATION

B.SC Information Technology - 85% Pass out year- 2025
Institute - KG College of Arts and Science , Coimbatore.

- IDLE (Python)
- CSS Loaders
- Google Fonts

PROJECTS

Project 1

Title : Photo Frames Shopping Website

Technology : React.js, Node.js

API : Nodemailer (to send customer details and confirm orders via email)

Database : MongoDB (NoSQL)

Description : Developed an e-commerce platform for photo frames with order confirmation emails sent using Nodemailer API.

Project 2

Title : Movie Search and Rating Website

Technology : HTML, CSS , JavaScript

API : TMDb (The Movie Database) API

Description : Created a dynamic movie search and rating website using React.js integrated with TMDb API to fetch real-time movie data and ratings.

Project 3

Title : User Login and Logout System

Technology : Frontend design with React.js and Backend with Express.js

Database : MongoDB

Description : Created a dynamic movie search and rating website using React.js integrated with TMDb API to fetch real-time movie data and ratings.

All projects are available on my GitHub repository : <https://github.com/hariharan2701-IT>

DECLARATION

I hereby declare that the all above information true and best of my knowledge.
